C- INFORMATION ON BUSINESS ACTIVITIES

Pegasus is Turkey's leading low-cost airline. Pegasus entered the aviation sector through charter flights in 1990. Following its acquisition by Esas Holding at the beginning of 2005, Pegasus changed its business model, introducing a low-cost network carrier model and focused on providing affordable and on-time air travel service with a young fleet.

As a result of the successful implementation of this low-cost strategy, Pegasus experienced rapid expansion of its operations both in domestic routes as well as internationally. In comparison to the cumulative annual growth rate of the Turkish market between 2007 and 2015 at 12%, the cumulative annual growth rate of passengers flying with Pegasus reached 31% during the same period. In addition to being the fastest growing airline in Turkey in terms of passenger numbers during this period, Pegasus was the fastest growing airline among the 25 largest European airlines in terms of seat capacity in 2011, 2012 and 2013 according to the Official Airline Guide (OAG).

Pegasus focuses on providing high-frequency services on short- and medium-haul, point-to-point and transit routes on its domestic and international network primarily from its main hub in Istanbul Sabiha Gökçen International Airport. Pegasus also offers scheduled flights from other domestic hubs, primarily in Adana, Ankara, Antalya and İzmir. As of December 31, 2015, Pegasus offered scheduled passenger services on 33 domestic routes in Turkey and 70 international routes to European (including North Cyprus), CIS, Middle Eastern and African destinations, serving a flight network covering 103 destinations in 40 different countries.

Pegasus also offers a number of services ancillary to the core air passenger services and generates revenue through the provision of these services, including pre-order and in-flight sales of beverages and food, sales of duty-free items on board international flights, excess baggage, reservation change and cancellation fees, airport check-in and seat selection fees. In 2015, the revenue recorded from ancillary services constituted 19% of total revenue for the period, while ancillary revenue increased by 25% year-over-year from 2014.

In addition to the above, Pegasus derives revenue from other services, primarily consisting of cargo services and a relatively low volume of charter and split charter flights for tour operators, which represented 6% of total revenue in 2015.

4- COMPANY'S BUSINESS AND MATERIAL DEVELOPMENTS RELATING TO THE COMPANY ACTIVITIES

A- SECTORAL OUTLOOK, AND POSITION OF THE COMPANY IN THE SECTOR, INFORMATION ON PRODUCTION UNITS, SALES, PRICING AND CHANGES IN THE FOREGOING THROUGHOUT THE YEAR; INFORMATION ON PRODUCTIVITY AND ANY CHANGES IN CONTRAST TO PREVIOUS YEARS

International Aviation Market

Globalization and the rapid expansion of worldwide trade volume turned transportation into one of the key sectors of today's world economy. Parallel to this development the aviation sector, in particular, is experiencing growth at high levels and is playing a leading role in international and intercontinental integration.

In the past thirty years, the aviation sector gained a strong momentum amid increasingly dense social, political and economic relations and rose to prominence ahead of other methods of transportation. According to International Civil Aviation Organization (ICAO) data, scheduled passenger movement of 100 million persons in the 1950s reached 1 billion passengers in 1976 and 6.6 billion passengers in 2014. As this number represents two-way traffic, the real scheduled passenger number is estimated at 3.3 billion. According to ICAO data, total passengers carried by air transportation reached 3.8 billion in 2015. According to ICAO, the total passengers to be carried by air transportation is expected to rise to 7.3 billion by 2034.

Turkish Aviation Market

Since 2003 Turkish civil aviation market has been one of the fastest developing markets thanks to a number of regulatory amendments beginning with the removal of price tariffs on domestic flights in 2001.

High airfares due to lack of competition in domestic flights prior to 2001 had prevented growth in the Turkish civil aviation market. Domestic competition emerged following the removal of taxes on air transportation, other than VAT on ticket prices, in 2003. These changes made air transportation more affordable to Turkish citizens and triggered growth in the market.

The Turkish civil aviation industry significantly outperformed gross domestic product (GDP) in the last 12 years. Between 2003 and 2015 real Turkish GDP cumulative annual growth rate (CAGR) was 5%, while the upwards trend in terms of number of domestic passengers with CAGR of 21% in the same period was more than four times the growth in GDP. Number of domestic and international passengers increased by CAGR of 13% between 2003 and 2015. Turkish aviation market also resisted macroeconomic fluctuations during this period. For example, despite a 4.8% decline in GDP in 2009 domestic and international passenger numbers increased by 15.1 and 1.5%, respectively.

Development of Pegasus Market Share Since 2005

Following its acquisition by Esas Holding at the beginning of 2005, Pegasus changed its business model, introducing a low-cost network carrier model and focused on providing affordable and on-time air travel service with a young fleet.

As a result of the successful implementation of this low-cost strategy, Pegasus experienced rapid expansion of its operations both in domestic routes as well as internationally. In comparison to the cumulative annual growth rate of the Turkish market between 2007 and 2015 at 12%, the cumulative annual growth rate of the scheduled passengers flying with Pegasus reached 31% during the same period. In addition to being the fastest growing airline in Turkey in terms of passenger numbers during this period, Pegasus was the fastest growing airline among the 25 largest European airlines in terms of seat capacity in 2011, 2012 and 2013 according to the Official Airline Guide (OAG).

Total number of passengers carried by Pegasus in 2015 was 22.3 million. The total number of passengers carried in domestic and international flights in, into and from Turkey in the same period was 181.4 million according to the data provided by the General Directorate of State Airports Authority (DHMI).

Flying to 33 domestic destinations as of December 31, 2015, Pegasus increased total number of domestic passengers carried by 15% compared to 2014 and reached 13.8 million passengers and 82% load factor ratio. On the international scale, as of December 31, 2015, Pegasus flew to 70 destinations in 40 countries and increased the total number of passengers carried by 9.8% compared to 2014 to 8.5 million passengers in total, realizing a 75% load factor ratio.

The table below indicates Pegasus market share trend in terms of domestic and international scheduled passenger numbers between 2005 and 2015:

B- INFORMATION ON INVESTMENTS MADE BY PEGASUS IN THE RELEVANT ACCOUNTING PERIOD

Since 2005, Pegasus placed firm orders with Boeing for a total of 40 new B737-800NG aircraft and, as of December 31, 2014, all of the aircraft under the said Boeing Order have been taken delivery.

In addition to the aircraft subject to the Boeing orders, as of December 31, 2015 Pegasus consolidated fleet includes a total of 17 B737-800 NG and nine Airbus A320-200 ceo aircraft obtained through operational lease agreements. Pegasus consolidated fleet also includes one Boeing B737-400 operated by Air Manas.

Information relating to the aircraft operated by Pegasus and its consolidated subsidiaries as of December 31, 2015 is provided in the following table:

AIRCRAFT TYPE	RANGE (KM)	NUMBER OF AIRCRAFT			SEAT CAPACITY			AVERAGE FLEET AGE
		31.12.2015	31.12.2014	Growth (%)	31.12.2015	31.12.2014	Growth (%)	31.12.2015
B737-400	3,148	1	1	0	168	168	-	17,75
B737-800	4,360	57	50	14	10,773	9,450	9	5,66
Airbus A320	3,900	9	4	125	1,620	720	100	1,95
TOPLAM		67	55	22	12,561	10,338	22	5,33

In July 2012, Pegasus placed an order with Airbus for 57 firm order A320neo and 18 firm order A321 neo aircraft, totaling 75, and an additional 25 optional aircraft, thereby constituting a purchase order for 100 new aircraft.

Based on estimated list prices at the date of delivery (excluding price and payment term concessions but take into consideration the Company's expectation of applicable escalation adjustments and aircraft configurations), the Company's expected capital expenditures relating to the 75 firm order aircraft and 25 option aircraft (assuming the option is exercised in full) under the Airbus order, expected to be delivered between 2016 and 2022, amount to approximately USD 12 billion as of December 31, 2015.

In 2013 Pegasus decided on purchasing CFMI's Leap type engine from the two available options for the Airbus A320neo/A321neo aircraft purchase agreement. Based on this decision, the delivery of the new Airbus aircraft will commence in 2016. Pegasus further agreed with CFMI on the provision of maintenance services for a term for up to 20 years starting from the delivery of each engine. Based on the assumption that the entire Airbus order is purchased and the relevant aircraft and the engines are operated for 20 years, it is expected that the payments to be made in compensation of the maintenance services procured until 2042, may reach USD 4.3 billion.

In 2015 Pegasus signed an 8-year maintenance time and materials support agreement with CFMI with respect to the CFM56-7B engines used on its Boeing 737-800NG fleet. The agreement will cover up to 90 shop visits and as part of the agreement, Pegasus will further purchase four spare engines from CFM. The services, part and engines to be delivered pursuant to the agreement are valued at approximately US\$450 million at list prices.

The delivery schedule for the A320neo/A321neo aircraft subject to our firm order with Airbus is as follows:

Aircraft Type	2015	2016	2017	2018	2019	2020	2021	2022
A320neo	-	7	5	10	14	13	8	-
A321neo	-	-	-	-	-	-	5	13

() If the option for the 25 aircraft under the Airbus order is fully or partially exercised by Pegasus, the delivery of the option aircraft will commence after 2022, unless the parties agree on earlier deliveries.*

The Group has obtained investment incentive certificates covering a total of 13 aircraft. Accordingly, a 15% “investment contribution rate” will be calculated for the said 13 aircraft and until such calculated amount is reached, the income derived from incentivized investments will be subject to discounted corporate tax. Discounted corporate tax is 50% of the prevailing corporate tax rate for the relevant terms (e.g., corporate tax will apply as 10% instead of 20%). Due to corporate tax accrual as of December 31, 2015, the relevant investment contribution has been reflected on the Consolidated Financial Statements for the Accounting Period between January 1 – December 31, 2015.

"Pegasus Dividend Policy" was adopted by the decision of our Board of Directors dated November 20, 2013 and numbered 403 to be submitted for the approval of our shareholders at the first annual General Assembly Meeting.

"Pegasus Dividend Policy" that will be submitted to the shareholders' approval at the General Assembly Meeting includes the following principles:

- The main principles relating to the distribution of profit are laid out in Article 21 of our Articles of Association.
- In this framework, in the event there remains distributable profit following the deduction of previous years' losses from the net annual profit relating to a fiscal year, our shareholders have the authority to resolve on the distribution of profit, by taking into consideration our Company's goals and its financing requirements, in cash, in shares or a by using a combination of the two and the completion of distribution within the timeframe foreseen in the applicable law.
- The proposal for distribution of profit by our Board of Directors will be prepared in consideration of the above needs and will be submitted to the attention of our shareholders for discussion at the General Assembly. 6- RISKS AND THE EVALUATION OF THE MANAGEMENT BODY

A- INFORMATION ON THE RISK MANAGEMENT POLICY ADOPTED BY PEGASUS WITH RESPECT TO FORSEEABLE RISKS

Our Board of Directors is responsible for protecting the long-term benefits of our Company through a rational and prudent risk management approach by performing optimum balance between risk, growth and returns.

The Committee on the Early Detection of Risk has been formed as a Board of Directors Committee in order to assist the Board of Directors with respect to the determination in advance, management and mitigation of the risks that may endanger the existence, development and the future of Pegasus.

During the performance of its risk detection and management duties, the Committee on the Early Detection of Risk works in coordination with other Board Committees and the Company management. In this respect, the Committee on the Early Detection of Risk works in cooperation with the Audit Committee with respect to risks inherent to financial reporting and internal control mechanisms, with the Corporate Governance Committee with respect to human resources related risks involving the Board of Directors and the senior management, and with the Safety Committee for the surveillance of risks regarding flight safety.

Risk management policies implemented by Pegasus in 2015 within the framework of limits and guidance set out by the Board of Directors with respect to market risk (currency risk, interest rate risk and cost of fuel risk), credit risk and liquidity risk are summarized below.

a) Capital Risk

Our Company manages its capital with the goal of ensuring that it will be able to continue as a going concern while maximizing returns through the optimization of the debt and equity balance. Our Board of Directors and senior management reviews the cost of capital together with the risk associated with each class in the capital structure. Based on evaluations of our senior management and Board of Directors, the Company balances its overall capital structure from time to time through capital increases as well as the issue of new debt or the redemption of existing debt. In 2015, Pegasus financed net working capital shortcoming through short-term loans.

b) Currency Risk

The Group mainly generates revenue in TL and incurs indebtedness denominated in USD and other expenses in non-Euro currencies. Such non-Euro denominated transactions expose the Group to currency risk. Currency risk is managed through foreign exchange future purchase/sale transactions carried out in accordance with approved hedging policies.

Cash and non-cash assets and obligations of the Group denominated in foreign currency as of December 31, 2015 and December 31, 2014, are provided in Note 33 to the Consolidated Financial Statements for the period between January 1, 2015 – December 31, 2015.

c) Fuel Price Risk

Fuel costs constitute our largest operating expense, representing 37% our total cost of sales for 2015. Fuel prices may be subject to wide fluctuations based on geopolitical issues, exchange rate fluctuations, supply and demand as well as market speculation. The fluctuations in fuel prices have had a significant impact on our cost of sales and, in turn, on our results of operations.

Pegasus manages its risk to fuel prices through the use of derivative financial instruments. The Company's policy since 2011 includes a primary non-discretionary program for the first 30% of anticipated fuel consumption and a supplemental discretionary program for an additional 30% of our anticipated fuel consumption up to twelve months. Both programs use swap and option arrangements on jet fuel and Brent oil. There has been no change to the Group's exposure to market risks or the manner in which it manages and measures the risk. As of December 31, 2015, 46% of the 2015 fuel consumption and 60% of the expected fuel consumption for 2016 had been subject to hedging transactions.

d) Interest Rate Risk

Pegasus is exposed to interest rate risk as the Company borrows funds at both fixed and floating interest rates. The Company aims to manage interest rate risk through an appropriate combination of fixed and floating rate based borrowings. In analyzing the floating rate interest obligations, the Company assumes that the year-end balance is present throughout the year and takes into account a 10-15% fluctuation in the applicable interest rates.

e) Credit Risk

Pegasus management defines credit risk as risk relating to the ability to collect receivables. Receivables that are due past more than one year are classified as impaired assets.

f) Liquidity Risk

Pegasus manages liquidity risk by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities

B- INFORMATION ON THE WORK AND REPORTING OF THE COMMITTEE ON THE EARLY DETECTION OF RISKS

Committee on the Early Detection of Risks was established by the resolution of our Board of Directors dated August 17, 2013 and numbered 392, and is composed of three members, including the chairman. The Committee Charter was approved by the same Board resolution and has been publicly announced through the Public Disclosure Platform and our Investor Relations website. In 2015, our Independent Director Mehmet SAĞIROĞLU assumed the role of Committee chairman and our Independent Director Saad Hassan HAMMAD and İnan TANRIÖVER served as members of the Committee.

Pursuant to its Charter the Committee convenes and adopts decisions by majority. The Committee convenes for meetings at least four times a year. The timing of Committee meetings follow, to the extent possible, the schedule of the meetings of the Board of Directors by having a meeting ahead of each scheduled Board meeting. In case of urgency the Committee may convene for meetings at the request of the chairman of the Committee or the chairman of the Board of Directors. In 2015, the Committee convened for meetings six times on March 3, April 14, May 5, July 31, November 11 and December 14 and also held a joint meeting with the Audit Committee on May 5, thereby completing seven meetings during the year.

The Committee established the main principles and review processes with respect to the main risks determined on strategic, operational, financial, legal and other risks that may endanger the existence, development and the future of Pegasus, and the implementation of necessary precautionary measures and the management of detected risks and periodically reports its findings to the Board of Directors.

C- FORWARD LOOKING RISKS WITH RESPECT TO SALES, PROFITABILITY, REVENUE GENERATION, EFFICIENCY, DEBT/EQUITY RATIO AND SIMILAR EVENTS

As part of the lawsuits filed by the Company for the cancellation of the accrued VAT liability of TL 30.872.430 and tax penalties totaling TL 46.308.645 imposed against the Company in connection with the VAT rates remitted on behalf of the non-resident aircraft lessor companies that are party to finance lease transactions for 2009, 2010, 2011 and January 2012, VAT accruals totaling TL 24,499,790 and tax penalties totaling TL 36,749,685 for all periods of 2011 have been revoked by the Istanbul 11th and 5th Tax Courts presiding over part of the pending lawsuits. In their judgements the Courts argued that 1% VAT should apply to financial lease services procured from non-resident aircraft lessor companies and that the 18% penalized tax accrual is in violation of the law. The lawsuits filed against the tax accrual and tax penalties are under review by different courts as a separate lawsuit is filed against each monthly period. It should be noted that the lawsuits filed for the periods 2009, January and February 2010 and January 2012 are pending review of the court of first instance whereas the decisions of the Istanbul 11th and 5th Tax Courts may be appealed by the Tax Administration and therefore are not final as of the date of this Report.

The proposed amendments were published on the Public Disclosure Platform on January 29, 2016. The proposed amendments have been approved by the Capital Markets Board on February 5, 2016 and by the Ministry of Customs and Commerce on February 23, 2016.

Mr. Mehmet SAĞIROĞLU, who has been serving as an Independent Director at Pegasus since April 2013 deceased on January 28, 2016 and his term of office as a member of our Board of Directors ended as of the said date. As of the date of this Report no appointment was made by the Board of Directors in his replacement.

Conor John McCARTHY, serving as a non-executive director at the Company, has been appointed as an independent director to replace Mehmet SAĞIROĞLU until the Annual General Assembly Meeting to take place in 2016 in accordance with the provisions of Article 4.3.8 of the Corporate Governance Principles annexed to the Corporate Governance Communiqué No: II-17.1 and the non-objection received from the Capital Markets Board on February 29, 2016.

On March 1, 2016, our Board of Directors resolved on the commencement of negotiations with Boeing for the purchase of five new B737-800 NG aircraft. The aircraft are expected to be delivered in 2017 and based on expected list prices at the date of delivery (*i.e.*, list prices that exclude price and payment term concessions but take into consideration our expectation of applicable escalation adjustments and aircraft configurations), the expected capital expenditures related to these aircraft total approximately USD 505 million.

Other than those mentioned above and in the relevant parts of this Report there has not been any material development affecting the rights of the stakeholders mentioned above.

PEGASUS HAVA TAŞIMACILIĞI ANONİM ŞİRKETİ
CORPORATE GOVERNANCE PRINCIPLES COMPLIANCE REPORT

SECTION I - CORPORATE GOVERNANCE PRINCIPLES COMPLIANCE STATEMENT

During the year that ended on December 31, 2015, the Corporate Governance Principles determined by the Capital Markets Board have been implemented by Pegasus as described below.

Immediately following the initial public offering of its shares in April 2013, Pegasus started working on ensuring compliance with the mandatory and non-mandatory Corporate Governance Principles as fast and to the widest extent as possible and such efforts have been overseen by both our Board of Directors and our Corporate Governance Committee. Consequently, the Company achieved full compliance with the mandatory Corporate Governance Principles and has also substantially complied with the remaining, non-mandatory Corporate Governance Principles within the same year as the initial public offering of its shares. This was endorsed by the compliance rating of 8.13 out of 10.00 attained by Pegasus at the end of 2013, following the independent rating study undertaken by Kobirate Uluslararası Kredi Derecelendirme ve Kurumsal Yönetim Hizmetleri A.Ş., whereby Pegasus became the first publicly traded entity to have undergone such independent assessment in the same year of its flotation of shares.

Later review of our corporate governance compliance resulted in the following assessment scores (each out of a scale of 10.00), a detailed report for each can be found on our Investor Relations website.

Reporting Date	Scope	Compliance Rating
March 3, 2014	Interim review in light of the new Corporate Governance Communiqué No. II-17.1	8.07
October 24, 2014	Annual review	8.77
September 29, 2015	Annual review	9.03

Pegasus has been included in the BIST Corporate Governance Index since 2014 and remains committed to continuously reviewing domestic and international developments in corporate governance and further improving its corporate governance practices. As part of the initiatives for improving the Company's corporate governance practices, in 2015, Pegasus brought further enhancements in shareholder and stakeholder relations through improvements made in financial reporting, communications relating to General Assembly meetings and internal corporate policies.

The relevant Corporate Governance Principles with which, as of December 31, 2015, our Company had not yet attained full compliance are listed below:

- Minority rights have not been granted to those holding less than 5% of the Company capital, which is the statutory threshold, and the scope of statutory minority rights have not been broadened through special provisions in our Articles of Association.
- Pegasus does not have an active practice regarding rewarding or dismissal of Directors as part of performance evaluation studies conducted by the Board of Directors.
- Remuneration and benefits provided to members of senior management is not disclosed on an individual basis.

Under the auspices of the Corporate Governance Committee, we are undertaking studies to improve current corporate governance practices and are regularly reviewing the foregoing matters for any need to change existing practices. In this respect, the existing Board self-assessment scheme was revised in 2015 into a more advanced model and now includes tools for assessing performance at both committee and individual levels. With respect to extending minority rights by virtue of an amendment to the Articles of Association, the Company's assessment is that given the Company's fulfillment of the minimum statutory requirements in this regard, the absence of extended minority rights does not create any conflict of interest. Finally, for the year 2015, the Company decided to continue to disclose board and senior management remuneration and benefits on a consolidated basis, which is regarded to be in line with the practice adopted by BIST Corporate Governance Index participants.
