COVID-19 Effects and Impairment Analysis

The COVID-19 pandemic which affected the world, had a significant impact on the aviation industry in which the Group operates. At the end of the first quarter of 2020, country-based travel restrictions were followed by suspension of both international and domestic flights on March 27, 2020 and March 28, 2020, respectively. The Group started its operations in June within the scope of countries where domestic and international flights are allowed. Revenue and profitability of the Group decreased compared to previous year due to these effects.

The Group takes measures to reduce costs, conserve its cash position and balance its current ratio. Within the scope of these measures;

- Payroll cost is being tried to be optimized with short-term employment allowance provided by the Government's support package,
- Permanent discounts and/or deferral of payments are targeted in contracts with all suppliers in order to support cash flow management,
- Fixed costs are decreased through remote working scheme in 2020. Further permanent savings are targeted with remote working.
- Aircraft maintenance activities are optimized and updated according to the current flight schedules,
- General expenditure budgets are reviewed continually and accordingly savings are tried to be achieved both with cost control and cash management perspectives. Therefore, non-urgent projects and investments are postponed.
- During the pandemic period, new credit lines from various banks are obtained in order to better manage the Group's cash flow.

Although the company's flights have resumed partly in June 2020, there are still some risks and uncertainties regarding the development of the COVID-19 outbreak. If these risks occur, the Group’s operations may be adversely affected. The Management of the Group closely monitors all action plans on daily basis through various business scenarios.

NOTE 1 - ORGANIZATION AND OPERATIONS OF THE GROUP

COVID-19 Effects and Impairment Analysis

Based on current market conditions and depending on the progress of the vaccination in the world and in Turkey, the Company's main scenario is to approach circa 85% of 2019 "Available Seat Kilometers" (ASK) levels during the 3rd quarter of 2021, which is the high tourism season of Turkey. For the whole year 2021, its expected that ASK production will be approximately 70-75% of those realized in 2019. Parallel to these expectations, no growth at the fleet is planned in 2021(2020:93; 2021:91). Capacity expectations are all subject to review depending on the evolution of COVID-19 and travel restrictions. The main objective of the group is to utilize the fleet in the routes that generate positive cash. Under current circumstances and production plans the Group foresees that the current liquidity levels are enough throughout 2021.

On the other hand, as of March 31, 2021, the Group evaluated whether there is any risk of impairment on aircraft, tangible fixed assets, and intangible assets due to the effects of the COVID-19 outbreak, and in the light of the analysis made, it is concluded that there is not any impairment risk regarding the determination of the value-in-use of the assets. In the impairment tests, the Group used some estimates such as number of passengers, passenger load factor, fuel prices and discount rates. The Group management will continue to make these analyses regularly.

2.4 The new standards, amendments and interpretations

The accounting policies adopted in preparation of the condensed consolidated financial statements as at March 31, 2021 are consistent with those of the previous financial year, except for the adoption of new and amended TFRS and TFRIC interpretations effective as of January 1, 2021. The effects of these standards and interpretations on the Group's financial position and performance have been disclosed in the related paragraphs.

i) The new standards, amendments and interpretations which are effective as at January 1, 2021 are as follows:

Amendments to TFRS 9, TAS 39, TFRS 7, TFRS 4 and TFRS - 16 Interest Rate Benchmark Reform – Phase 2

In December 2020, the POA issued Interest Rate Benchmark Reform – Phase 2, Amendments to TFRS 9, TAS 39, TFRS 7, TFRS 4 and TFRS 16 to provide temporary reliefs which address the financial reporting effects when an interbank offering rate (IBOR) is replaced with an alternative nearly risk-free rate (RFR), amending the followings. The amendments are effective for periods beginning on or after 1 January 2021. Earlier application is permitted and must be disclosed.

Practical expedient for changes in the basis for determining the contractual cash flows as a result of IBOR reform

The amendments include a practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest. Under this practical expedient, if the interest rates applicable to financial instruments change as a result of the IBOR reform, the situation is not considered as a derecognition or contract modification; instead, this would be determined by recalculating the carrying amount of the financial instrument using the original effective interest rate to discount the revised contractual cash flows.

The practical expedient is required for entities applying TFRS 4 Insurance Contracts that are using the exemption from TFRS 9 Financial Instruments (and, therefore, apply TAS 39 Financial Instruments: Classification and Measurement) and for TFRS 16 Leases, to lease modifications required by IBOR reform.

Relief from discontinuing hedging relationships

- The amendments permit changes required by IBOR reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued.
- Amounts accumulated in the cash flow hedge reserve are deemed to be based on the RFR.

(Amounts are expressed in TL unless otherwise stated.)

NOTE 2 - BASIS OF PRESENTATION OF FINANCIAL STATEMENTS

2.4 The new standards, amendments and interpretations

i) The new standards, amendments and interpretations which are effective as at January 1, 2021 are as follows :

Relief from discontinuing hedging relationships

- For the TAS 39 assessment of retrospective hedge effectiveness, on transition to an RFR, entities may elect on a hedge-by-hedge basis, to reset the cumulative fair value changes to zero.

- The amendments provide relief for items within a designated group of items (such as those forming part of a macro cash flow hedging strategy) that are amended for modifications directly required by IBOR reform. The reliefs allow the hedging strategy to remain and not be discontinued.

- As instruments transition to RFRs, a hedging relationship may need to be modified more than once. The phase two reliefs apply each time a hedging relationship is modified as a direct result of IBOR reform.

Separately identifiable risk components

The amendments provide temporary relief to entities from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component.

Additional disclosures

Amendments need additional TFRS 7 Financial Instruments disclosures such as; How the entity is managing the transition to RFRs, its progress and the risks to which it is exposed arising from financial instruments due to IBOR reform, quantitative information about financial instruments that have yet to transition to RFRs and If IBOR reform has given rise to changes in the entity's risk management strategy, a description of these changes.

The amendments are mandatory, with earlier application permitted. While application is retrospective, an entity is not required to restate prior periods.

The standard does not have an impact on the financial position or performance of the Group.

ii) Standards issued but not yet effective and not early adopted

Standards, interpretations and amendments to existing standards that are issued but not yet effective up to "the date of issuance of the consolidated financial statements are as follows. The Group will make the necessary changes if not indicated otherwise, which will be affecting the consolidated financial statements and disclosures, when the new standards and interpretations become effective.

The Group is managed as a single business unit that provides low fares airline-related services, including scheduled services, charter services, ancillary services and other services. The Group's Chief Operating Decision Maker is the Board of Directors. The resource allocation decisions are based on the entire network and the deployment of the entire aircraft fleet. The objective in making resource allocation decisions is to maximise consolidated financial results, rather than results on individual routes within the network. All other assets and liabilities have been allocated to the Group's single reportable segment.

NOTE 11 - PROVISIONS, CONTINGENT ASSETS AND LIABILITIES

Tax Inspection

Value Added Tax Inspection Report Number 2013-B-228/6, is based on the allegation that corporation tax withholdings arising on such amounts set forth to be accrued under such Corporation Tax Withholding Inspection Report Number 2013-B-228/5, and corporation tax withholdings anticipated under the said report are at the same time subject to value added tax withholding. In addition, in this report, the VAT calculation with the title of responsible for the intangible rights procured from abroad was brought to the agenda.

In the aforesaid process, all of the lawsuits filed with the demand for rescission of such fined value added tax assessments imposed in the name of the Company as per respective monthly periods of year 2010, with the claim that the rate of value added tax required to be calculated over corporation tax withholdings claimed as being payable over such leasing payments with respect to aircraft subject matter of financial leasing with the purpose of acquiring the same from companies with legal domiciles as well as principal places of business abroad being 18% are concluded, and such lawsuits filed in tax courts are concluded in favor of the Company. A part of the judgments were subject to appeal by Major Taxpayers Tax Office before Istanbul Tax Court due to their amounts, but in respect of judgment of İstanbul Regional Administrative Court, the appeals has been rejected and lawsuits were concluded in favor of the Company. The decision was appealed by the Tax Office and the decision of the first instance court was approved as a result of the appeal. The Tax Office has applied for the correction of the decision and our response to this application has been submitted to the file. In March 2020, the decision for the correction of the decision was rejected and the decision to lift the penalty for the corporate tax (withholding tax) corresponding to the payments made against financial leases was finalized. The Court decided to partially reject (for the TL 9.103 part) the decision to disrupt the appeal at the stage of appeal and the VAT amount, which is limited only for this amount, to be reversed at the appeal stage and sent to the local Court for renegotiation.

As can be seen from the explanations above, all the lawsuits filed for the Corporate Tax Review Report, Corporate Tax Withholding Review Report and Value Added Tax Withholding Review Report (excluding VAT lawsuit with the amount of TL 9.103) resulted positively.

Financial Risk Factors

Foreign currency risk management

Foreign currency sensitivity

The Group is exposed to foreign exchange risk arising primarily with respect to the US Dollar and Turkish Lira.

The following table details the Group's sensitivity to a 10% increase and decrease in US Dollar, and TL. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated items and adjusts their translation at the period end for a 10% change in foreign currency rates.

Foreign currency sensitivity tables as of 31 March 2021 and 31 December 2020 are as follows:

NOTE 24 - FINANCIAL INSTRUMENTS (FAIR VALUE AND HEDGE ACCOUNTING DISCLOSURES)

Fair Value of Financial Instruments

The fair values of financial assets and financial liabilities are determined and grouped as follows:

- Level 1: the fair value of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices:
- Level 2: the fair value of other financial assets and financial liabilities (excluding derivative instruments) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions; and
- Level 3: the fair value of financial assets and liabilities are determined by the input that does not reflect an actual data observed in the market while finding the fair value of an asset or liability.
